Remove contaminated clothing.

If inhaled:

Keep patient calm, remove to fresh air, seek medical attention.

On skin contact:

Wash thoroughly with soap and water

On contact with eyes:

Immediately wash affected eyes for at least 15 minutes under running water with eyelids held open, consult an eye specialist.

On ingestion:

Rinse mouth and then drink 200-300 ml of water. Do not induce vomiting unless told to by a poison control center or doctor.

### Most important symptoms and effects, both acute and delayed

Symptoms: Information, i.e. additional information on symptoms and effects may be included in the GHS labeling phrases available in Section 2 and in the Toxicological assessments available in Section 11.

Hazards: No hazards anticipated.

**Indication of any immediate medical attention and special treatment needed**

| Treatment: Symptomatic treatment (decontamination, vital functions).

**5. Fire-Fighting Measures****Extinguishing media**

Suitable extinguishing media:

| water spray, dry powder, foam, carbon dioxide

**Special hazards arising from the substance or mixture**

| No particular hazards known.

**Advice for fire-fighters**

Special protective equipment:

| No data available.

Further information:

| Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.  
| Product itself is non-combustible; fire extinguishing method of surrounding areas must be considered.

---

**6. Accidental Release Measures****Personal precautions, protective equipment and emergency procedures**

| Use personal protective clothing. Avoid contact with skin and eyes.

**Environmental precautions**

| Do not release untreated into natural waters.

**Methods and material for containment and cleaning up**

| For small amounts: Pick up with suitable absorbent material (e.g. sand, sawdust, general-purpose binder, kieselguhr). Dispose of absorbed material in accordance with regulations.  
| For large amounts: Pump off product.

**7. Handling and Storage****Precautions for safe handling**

| Handle in accordance with good industrial hygiene and safety practice. After long storage, slight quantities of carbon monoxide may be formed. To our best knowledge, the occupational exposure limit (OEL) is not exceeded during use. Entering of tanks must only be performed after intensive cleaning and when it is ensured that residual vapours have been removed. Consideration of national laws and international standards for confined space entry should be taken in to account. In case of doubt, the concentration of Carbon monoxide must be determined.

## Hand protection:

| Suitable chemical resistant safety gloves (EN ISO 374-1) also with prolonged, direct contact (Recommended: Protective index 6, corresponding > 480 minutes of permeation time according to EN ISO 374-1): E.g. nitrile rubber (0.4 mm), chloroprene rubber (0.5 mm), butyl rubber (0.7 mm) etc. Supplementary note: The specifications are based on tests, literature data and information of glove manufacturers or are derived from similar substances by analogy. Due to many conditions (e.g. temperature) it must be considered, that the practical usage of a chemical-protective glove in practice may be much shorter than the permeation time determined through testing.

## Eye protection:

| Safety glasses with side-shields (frame goggles) (e.g. EN 166)

General safety and hygiene measures

| Hands and/or face should be washed before breaks and at the end of the shift. Avoid contact with skin and eyes.
